

Precisely what you're looking
for in precision moulding

VeriShot™

Single Valve Gate Technology

The VeriShot™ enables you to precisely control your injection process. With an excellent thermal profile, VeriShot™ ensures a wide molding window and is capable of processing an extensive range of both engineering and commodity polymers. Low mould filling stress results in superior part quality and consistency.

Extremely compact designed VeriShot™ system greatly reduces mold height requirements as it acts as the locating ring housing the mechanics. This ensures perfect alignment between mould and machine platens.

With Stainless Steel construction for maximum service life, the VeriShot™ is a drop in solution with a reduced mould height at 54mm+ nozzles.

Pre-assembled, VeriShot™ features Mastips FlowLoc™ threaded leak-proof nozzles with advanced heating technology for optimum control, providing exceptional thermal performance for improved part quality making it ideal for applications requiring a cosmetic gate finish, exceptional flow rates, large volume parts with dimensional accuracy.

VeriShot™ is compatible with TX19 and TX27 FlowLoc™ nozzles, which screw directly into the lower manifold providing a secure, leak-proof solution. With patent-pending technology that includes high-temperature seals and adjustable valve pins, the system provides a flawless injection moulding process.

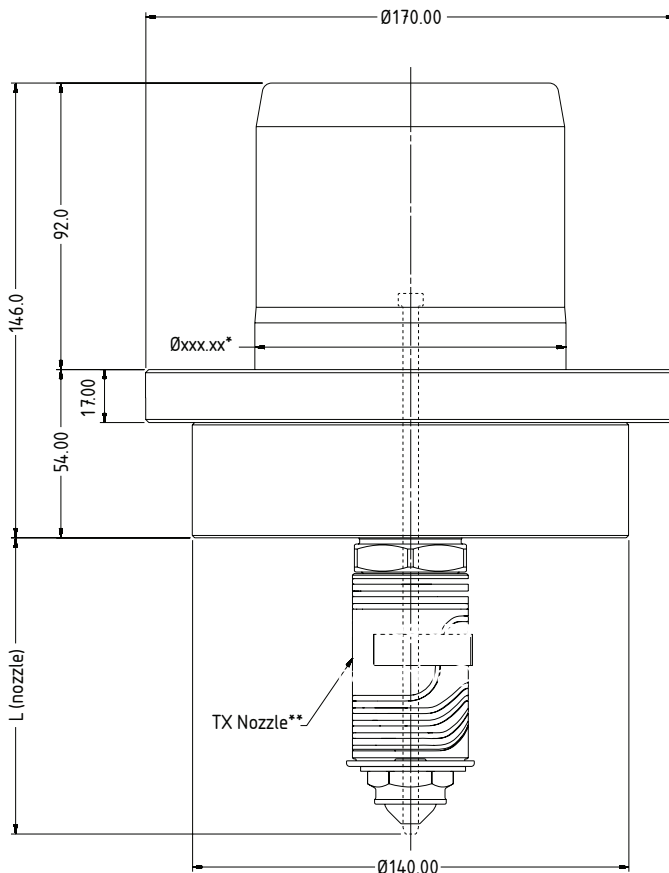

Speak to us today about our latest innovation, the industry-defining, VeriShot™ Single Valve Gate System and what it can bring to your business

Comparison Guide of Verishots Key Features:

Features	Mastip VeriShot	MoldMasters	Thermoplay
Shortest Nozzle	75	50	76
Longest Nozzle (From Backplate)	600	488	200
Tip To Back Plate Minimum	129	97	172
All Stainless Steel Unit	YES	NO	NO
Pre Assembled	YES	NO	YES
Leak Proof Screwed in Nozzle	YES	NO	NO
Location Possible with SVG	YES	YES	YES
Drop in solution	YES	NO	YES
Number of Heat Zones	2	2	2

Information correct at time of printing
Measurements in Millimeters

Hot Half Section

* Locating Ring Diameter: Metric - 99.85, Inch - 101.34(4")

* Available in 19 and 27 Series FlowLoc™ Nozzle

Start a conversation with us today about precisely what the VeriShot can do for you!

The VeriShot is a global leader in its field and the best choice in single valve gate systems available on the market today.

We pride ourselves on ensuring our commitment to excellent customer service is evident throughout the entire process, from the specifications, to design, to delivery and beyond, we are invested in all our products delivering superior outcomes for our clients.
